

NORCON FERTILIZER

To whom it may concern,

Norcon Fertilizer is a locally owned and operated business. We take great care in assuring that our customer's needs are met in organic production. As such, we pride ourselves in ensuring we do all we can to protect our customers organic production quality. We use specific tanks ONLY for organic products that are used for application via center pivot irrigation. If a different tank is to be used, a thorough internal and external triple rinse procedure takes place to ensure there is no non-organic residue left in the tank, pump, or hoses. In the event of a dry fertilizer application, all application equipment is triple rinsed, inside and out to ensure organic standards are upheld. If any further information is required, please contact me at 719-588-1348.

Thank you,

Spencer McDaniel
